RE: Phase I Environmental Site Assessment
26 Monroe Street
Norwalk, Connecticut
Eagle Project No. 25-044.16T1

Dear Ms. Stewart:

Eagle Environmental, Inc. (Eagle) completed a Phase I Environmental Site Assessment for the Norwalk Housing Authority property located at 26 Monroe Street, Connecticut. The Phase I ESA was performed to support a proposed renovation project at the Site that will potentially utilize funding through the Connecticut Housing Finance Authority (CHFA) and the State of Connecticut Department of Housing (DOH).

The Phase I Environmental Site Assessment was performed in general accordance with American Testing and Materials (ASTM) Standard E1527-21 and meets EPA's All Appropriate Inquiry (AAI) standard and Connecticut Department of Energy and Environmental Protection (CTDEEP) Site Characterization Guidance Document (SCGD). The Phase I ESA was also completed in general accordance with the Connecticut Housing Finance Authority (CHFA) Construction Guidelines: Environmental & Hazardous Materials Review, 2025.

Based on the completed Phase I Site Assessment, Eagle has identified two *Recognized Environmental Conditions* (RECs) and four *Areas of Concern* (AOCs) in connection with the Site. The RECs and AOCs are summarized on **FIG-3.**

- REC-1/ AOC-1- Former Krest Plastics Manufacturing Company
- REC-2/ AOC-2 Former Tin Shop
- AOC-3- Hydraulic Elevator AST
- AOC-4- Pad-mounted Transformer

A business environmental risk (BER) is identified for the Site for hazardous building materials (HMBs).

Details of the investigation activities and findings are provided in the enclosed report. Thank you for the opportunity to assist you with this project. Please contact us directly if you have any questions related to the report.

Sincerely,
Eagle Environmental, Inc.

EXECUTIVE SUMMARY

Eagle Environmental, Inc. (Eagle) performed a Phase I Environmental Site Assessment (ESA) on the Norwalk Housing Authority property located at 26 Monroe Street (the "Site"). The location of the Site is provided in **FIG-1** and an aerial photograph of the Site and vicinity is provided in **FIG-2**. The Phase I ESA was performed on behalf of Sound Communities to support a proposed renovation project at the Site that will potentially utilize funding through the Connecticut Housing Finance Authority (CHFA) and the State of Connecticut Department of Housing (DOH). The City of Norwalk Housing Authority currently owns the Site.

This Phase I ESA was performed in accordance with the scope and limitations of American Society for Testing and Materials (ASTM) standards E1527-21 and meets EPA's All Appropriate Inquiry (AAI) standard. The Phase I ESA included an environmental databases search, review of local, state, and federal regulatory agency files, and a limited reconnaissance of the Site and vicinity for potential off-site contamination sources that could impact the Site. The Phase I ESA was completed in accordance with the Connecticut Department of Energy and Environmental Protection (CTDEEP) Site Characterization Guidance Document (SCGD) dated September 2007 (Revised December 2010). The Phase I ESA was also completed in general accordance with the Connecticut Housing Finance Authority (CHFA) Construction Guidelines: Environmental & Hazardous Materials Review, 2025.

No sampling or other intrusive activities were conducted as part of the Phase I ESA. Additionally, an evaluation of building materials for the presence of suspected asbestos-containing material (ACM), lead-based paint (LBP), and poly-chlorinated biphenyls (PCBs) and an evaluation for the presence of radon gas were not included in the scope of work for the Phase I ESA.

The major findings of the Phase I ESA are as follows:

- The Site is developed with a 99,960- square foot, four story apartment building that was built in 1968. The building contain 49 apartments including efficiency, one and two bedroom apartments units. The Site includes a paved parking lot and grassed lawn area. The Site is located on approximately 1.8 acres of the 2.18-acre property.
- The Property is bisected the State Street roadway on the eastern portion of the Site followed by a one-story building and parking lot that is used by the Norwalk Housing Authority 24 ½ Monroe Street.
- The current building on the Site were built in 1968. The Site is currently owned by Norwalk Housing Authority but has been historically occupied by various residential owners and the Krest Plastics manufacturer.
- The building is heated by natural gas/ hot water. Multiple gas-fired water heaters and boilers were observed in the boiler room in the two-story building.
- Historical Sandborn maps indicate that the former Krest Plastic manufacturer was noted
- No evidence of current or underground storage tanks (USTs) was observed on Site.
- A pad- mounted transformer was located on- Site. was located on the western portion of the Site. No staining or odors were noted.
- An aboveground hydrail elevator reservoir was identified on in the elevator reservoir tank and a reservoir tank for the garbage compactor. No staining or orders were encountered.
- No environmental records were noted for the Site.
- Several nearby properties with listed hazardous waste generation and/or underground storage tank and former power plant activity were identified. Based on distance from the Site and/or remediation documentation, these properties would not be expected to have impacted the Site.
- The presence of emerging compounds such as per- and polyfluoroalkyl substances (PFAS) or 1,4 dioxane is possible based upon the former operation of the plastics manufacturer at the Site.

- A Vapor Encroachment Screen (VES) was obtained by Eagle via EDR. Based on the VES assessment and the Site reconnaissance, a Vapor Encroachment Condition (VEC) is possible at the Site based upon operations for the former plastic manufacturer.
- Hazardous building materials (HBMs) and radon are not noted as Business Environmental Risk (EBR) based upon the building's use and age of the buildings.
- The Site area does not appear to qualify as qualify as an "Establishment" as defined by the Connecticut Transfer Act based upon information reviewed as part of the Phase I ESA. However, a Property may be classified as an Establishment if the dry cleaner (Van Buren Cleaners- 24 Monroe Street) was located on-Site at the current 24 ½ Monroe Street building. Additional information is needed to determine if the dry cleaner was located on-Site However, determining the applicability of the Transfer Act to a property is ultimately a legal decision, so legal counsel should be consulted if a definitive determination of Transfer Act status is desired.

This assessment has revealed two *Recognized Environmental Conditions (* RECs) and four *Areas of Concern* (AOCs) in connection with the Site. The RECs and AOCs are summarized on **FIG-3.**

- REC-1/ AOC-1- Former Krest Plastics Manufacturing Company
- REC-2/ AOC-2 Former Tin Shop
- AOC-3- Hydraulic Elevator AST
- AOC-4- Pad-mounted Transformer

A Phase II ESA would be needed to assess soil and groundwater conditions to determine if releases occurred at the REC and AOCs that could have impacted soil and groundwater at the Site.

Additional research is needed to assess if the Property (Site) included the operations for the Van Buren Dry Cleaners at 24 Monroe Street was located at the Property. The 24 Monroe Street address is not on current tax assessor mapping.

Eagle has identified a business environmental risk with the possible presence of HBMs based upon the age of the buildings. A HBMA survey is recommended to be conducted prior to building renovations.

1.0 INTRODUCTION

Eagle performed a Phase I Environmental Site Assessment (ESA) for the Leroy D. Downs apartments, an approximately 2.18-acre property located at 26 Monroe Street (the "Site"). The Phase I ESA was completed on behalf of Sound Communities to support a grant application for the property. City of Norwalk Housing Authority currently owns the Site. The location of the Site is provided on **FIG-1**. An aerial photograph of the Site and vicinity is provided on **FIG-2**.

The purpose of the Phase I ESA is to determine if Recognized Environmental Conditions (RECs)[1] and Areas of Concern (AOCs) are present in connection with the Site from past or present property usage. The Phase I ESA was conducted in accordance with ASTM International (ASTM) Standard Practice E1527-21 ASTM (E1527-21) which is compliant with EPA's All Appropriate Inquiry (AAI) rule (40 CFR §312) and the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 (as amended, 40 USC 9601, et seq.). The Phase I ESA was also completed in general accordance with the Connecticut Department of Energy and Environmental Protection's (CTDEEP's) Site Characterization Guidance Document (SCGD) dated September 2007 (Revised December 2010). The Phase I ESA was also completed in general accordance with the Connecticut Housing Finance Authority (CHFA) Construction Guidelines: Environmental & Hazardous Materials Review, 2025.

1.1 Purpose

The purpose of the Phase I ESA was to:

- Identify RECs, defined by ASTM as a condition with the potential for a past, current, or future release of oil or hazardous materials (OHM) or AOCs by the CTDEEP SCGD at the Site.
- Identify historic RECs (HRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure without required controls or conditions.
- Identify controlled RECs (CRECs); defined by ASTM as a past release of OHM that has achieved regulatory closure with required controls or conditions
- Evaluate the potential for a release of OHM at the Site.

In addition, this Phase I ESA considers whether the Site may be an "Establishment" as defined under the Connecticut Transfer Act (Sections 22a-134 through 22a -134e of the Connecticut General Statutes), as amended.

1.2 Scope

The standard Phase I ESA scope of work includes the following tasks:

- Review of an environmental database search report for sites identified on various Federal and State regulatory databases including: National Priorities List (NPL); Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS); Resource Conservation and Recovery Act (RCRA); emergency response notification sites; State spills; underground storage tanks; leaking underground storage tanks; etc.
- Review of files and database listings at the Connecticut Department of Energy and Environmental Protection (DEEP) environmental Records Center in Hartford, Connecticut

---

1Recognized environmental conditions-the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions

2 Areas of Concern- Locations or areas at a site where hazardous waste and or hazardous substances (including petroleum products) have been or may have been used, stored, treated, handled, disposed, spilled, and/or released to the environment.

- Review of municipal files at the Tax Assessor's Office, Health Department, Fire Marshal's Office, and Building Department
- Site reconnaissance to observe readily apparent current conditions and uses
- A reconnaissance of surrounding properties to identify potential off-site sources of contamination
- Vapor encroachment screening based on information obtained via the environmental database report, local and/or state research and interview documentation

In accordance with the approved scope of work, Eagle did not collect samples for suspect asbestos containing material (ACM), lead-based paint (LBP), or radon gas as part of the Phase I investigation. A hazardous building materials assessment (HBMA) was not completed for this Site. However, based on the age of some of the building, HBMs are possible.

1.3 Significant Assumptions

Our opinion and conclusions are based on the information sources presented in this report, and a site reconnaissance of the Property. Eagle assumes that all available information obtained as part of this ESA including database records, interview information, and historic information is accurate and reliable.

1.4 Limitations and Exceptions

This report meets the general requirements for a Phase I ESA established by ASTM Standard Practice E1527-21. Eagle's Phase I ESA is subject to the following limitations:

The opinions provided herein are based on the information described in this report. Future investigations or information that was not available to Eagle may result in modification of the findings of this report. In preparing this report, Eagle relied on file information provided by state and local officials and information and representations made available to Eagle at the time of the report. If such information is incomplete or inaccurate, Eagle is not responsible. Eagle's professional services for this project have been performed in a manner consistent with that degree of skill and care ordinarily exercised by members of our profession currently practicing in the same locality, performing similar services under similar conditions. Eagle makes no other representations and no warranties, express or implied.

1.5 Special Terms and Conditions

This Phase I ESA was performed with no Special Terms and Conditions.

1.6 User Reliance

This report was prepared for the use of Sounds Communities.

2.0 SITE DESCRIPTION

2.1 Site Ownership and Location

Site Owner:	City of Norwalk Housing Authority
Site Occupant :	Residential- Elderly Housing Complex
Site Location:	26 Monroe Street, Norwalk, CT 06854
County:	Fairfield County
Parcel ID:	2-55-30-0
Latitude (North):	41° 5' 46.32"
Longitude (West):	-73° 25' 22.42"
Size	1.8 -acres (Site)/2.18 acres (Property)
Elevation:	22 to 30 feet above sea level

The Site is located on a 1.8 acre portion of the 2.18-acre property that is located in Norwalk, Connecticut. The Site is developed with a 99,960- square foot, four story apartment building that was built in 1968. The building contain 49 apartments including efficiency, one and two bedroom apartments units. The Site includes a paved parking lot and grassed lawn area. The Site is accessed from Monroe. The location of the Site is depicted on a Location Map provided on ***FIG-1*** and the aerial photograph of the Site and vicinity provided on ***FIG-2***.

2.2 Current Use of the Property

The Site is utilized as elderly and disabled housing.

2.3 Site Reconnaissance

Eagle representatives, Amy Muller, Environmental Scientist I and Lynn Willey, LEP, PG, Senior Manager Environmental Services performed visual observations of the Site during a Site Reconnaissance on March 07, 2025. The Site was observed by inspecting the property and entering the mechanical and maintenance spaces of the Site building. The purpose of the Site reconnaissance was to observe current Site conditions and assess, based on visual observations, if there were release(s) of OHM to the surface or subsurface that would constitute an REC and/or AOC. Photographs of the Site are included in ***Exhibit A***.

2.3.1 Water Supply

The Site building is connected to public water supplied by the First District Water Department.

2.3.2 Wastewater Disposal

The Property is connected to the municipal sanitary sewer system operated by the Norwalk Pollution Control Authority (NPCA).

2.3.3 Oil/Chemical Storage

The boiler room, which houses multiple hot water units, is located in the basement of the four-story building. The building is heated via natural gas, and multiple boilers were observed in the basement. Paints were observed in the first-floor trash compactor room. Two hydraulic oil tanks were observed on site, one on the first floor associated with the trash compactor and one associated with the elevator.

2.3.3.1 Stains, Corrosion or Odors

No staining, corrosion, or unusual odors were observed during the Site visit.

2.3.3.2 Drains, Sumps or Pools of Liquid

Multiple floor drains were observed throughout the boiler room. One sump was observed in the basement of the site building.

2.3.4 On-Site Storage Tanks

2.3.4.1 Underground Tanks

No underground storage tanks were observed during the Site visit.

2.3.4.2 Aboveground Tanks

Two aboveground oil storage (reservoir) tanks were observed during the Site visit. A reservoir tank was observed with the elevator and trash compactor. No stains were noted at the locations.

2.3.5 Transformers/PCB-Containing Equipment

One pad-mounted transformer was observed on the northwest corner of the site. No staining was observed. The PCB content of the transformers is unknown because a demarcation label was not observed. However, based upon the new installation of the structure, PCBs appear to be a low probability for the transformer.

As noted above, hydraulic oil reservoirs for the elevator and trash compactors. The PCB content in these reservoirs are unknown.

2.3.6 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed during the Site visit.

2.3.7 Stained Soil or Pavement

No stained soil or pavement was observed during the Site visit.

2.3.8 Odors and Stressed Vegetation

No unusual odors or stressed vegetation were observed during the Site visit.

2.3.9 Solid Waste

One trash compactor/receiver was seen on the first floor of the building. Large household waste pile was observed adjacent to the main entry.

2.4 Current Uses of Adjoining Properties

Eagle conducted an area reconnaissance by walking through the Site and observing the property and adjacent areas on March 7, 2025. Observed land uses in areas surrounding the Site are described below:

Northerly: Monroe Street followed by a housing development

Easterly: State Street Followed by South Norwalk Railroad Station Garage and the City of Norwalk Housing Authority offices.

City of Norwalk Housing Authority Offices.

Southerly: Former power plant -South Norwalk Electrical Works

Westerly: Dr. Martin Luther King Jr Drive

3.0 SITE AND AREA HISTORY

The Site and area history has been compiled from Sanborn Fire Insurance (Sanborn) Maps, City Directories, Historical Topographic Maps, Aerial Photographs of the Site and municipal records and interviews.

3.1 Sanborn Fire Insurance Maps

Certified Sanborn® Fire Insurance Maps were obtained via the *EDR Sanborn Fire Insurance Maps Library* in a *Certified Sanborn® Map Report, 26 Monroe Street, Norwalk, CT 06854 Inquiry No. 7603138.3* dated February 19, 2025 for the years 1884, 1889, 1895, 1900, 1906, 1912, 1922, 1950, 1958, and 1973.

A summary table of the information reviewed from the Sanborn Maps is provided below:

SANBORN MAP REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY)**	**CONCERNS**
1884	26 Monroe Street (Site)/ Property is unmapped for this year.	The Off-Site properties to the west, east and south of the Site are unmapped for this year. To the north, a driveway to Monroe Street is mapped followed by dwellings with a well and pump as four buildings noted for glass storage and store house.	None
1889	The Site is mapped but not developed. The eastern portion of the Property is mapped with two (2) two-story dwellings and a roadway running vertically though the central portion of the Site.	South-southeast of the Site is mapped with railroad tracks associated with the Housatonic Railroad followed by an embankment with additional railroad tracks owned by the New York and New Haven Railroad Co. A duck pond is noted to the southwest of the railroad tracks. The buildings to the north are absent. An unnamed street followed by residential dwellings. The Norwalk Hat Forming Company is noted to the northeast of the Site. East of the site is roadways and dwelling units Monroe Street is mapped to the northeast of the Site. West of the site is unmapped for this year; however, a roadway is mapped along the western boundary of the Site (currently Dr. Martin Luther King Boulevard).	None

SANBORN MAP REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY)**	**CONCERNS**
1895	The northwestern portion of the Site is mapped with two two-story dwelling. Three dwellings are mapped along the eastern portion of the Site. Otherwise, there are no other significant changes compared to the 1889 Sanborn map.	South of the Site is mapped with City Electric Light Station followed by residential dwellings. Two passenger railroad stations and a railroad station buildings are mapped to the southeast. North of the site is improved with dwellings and roadway (Madison) followed by Carraige painting and blacksmith are located to the north of Madison Street. The Hat Forming Company remains present to the northeast of the Site.	Off-Site Electric Power Plant
1900	The Site is mapped as vacant with the exception of two dwellings to the northwestern portion of the Site. State Street is mapped along the southern border of the Site. No other significant changes to the Site when compared to the 1895 Sanborn Map.	The power station (plant) to the south has an expanded footprint and is noted as the South Norwalk City Electric Works. No other significant changes to the Surrounding area compared to 1895 Sanborn map	Off-Site Electric Power Plant
1906	The western border of the Site is mapped with seven 2-story dwellings.	West of the Property/ Site is mapped dwellings and a note that says “Slope” Northeast of the site following Monroe Street is mapped with a repair shop at the corner of Monroe Street. The John Muth & Co. Electro Plating Company is noted to the north along Madison Street. A coal shed and Repair area are noted at the Power Plant to the south of the Site. Cavanaugh’s Express is noted to the south of Power Plant. No other significant changes to the surrounding properties compared to the 1900 Sanborn map.	Off-Site Electric Power Plant and Electroplating Operations.
1912	A shed and a garage on the southern portion of the Site	Additional expansion is noted at the South Norwalk Electrical Works located to the South of the Site. The John Muth & Co. Electro Plating Company is absent to the north of the Site. Otherwise, no significant changes to the surrounding properties compared to the 1906 Sanborn Map	Off-Site Electric Power Plant

SANBORN MAP REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY)**	**CONCERNS**
1922	No significant changes to the site compared to the 1922 Sanborn map	A large garage is noted at the location of a former Hat Forming Company. A mattress factory is noted to the north of the Site along Franklin Street Otherwise, no significant changes to the surrounding properties compared to the 1922 Sanborn Map	Off-Site Electric Power Plant
1950	Southwestern portion of the site is mapped with "Krest Mfg. Co. Plastics finishing" .Three additional one- car garages are noted associated with the dwellings to along Spring Street. A building used for lumber storage is noted along the northern boundary of the Site. A private garage is mapped at the northeastern portion of the property across State Street. No other significant changes compared to the 1922 Sanborn Map.	A filling station with three gas tanks, grease building and a garage are noted to the north of Monroe Street. A cleaning and dyeing operation is noted to the northeast of the Frankin Street and Monroe Street. Northeast of the Site/ Property is improved with commercial buildings (stores). Additional expansion of the power plant to the south with meter room and an auto parking building further to the south. Northwest abutting the site is an auto repair shop No other significant changes compared to the 1922 Sanborn Map	Off-Site Electric Power Plant and filling station and auto repair shop
1973	The site is improved with a four-story rectangular building labeled " housing for elderly 49 units" The previously mentioned buildings are no longer mapped.	North of the site following Monroe is improved with 90 residential units (Town House Garden Apts). Expansion of the power plant footprint is noted to the south. No other significant changes compared to the 1950 Sanborn Map	Off-Site Electric Power Plant

Copies of the Sanborn Fire Insurance Report are included in ***Appendix A***.

3.2 Topographic maps

Topographic maps were obtained via *EDR Topographic Map Library in EDR Historical Topo Map Report with Quad Match* ^{TM} *26 Monroe Street, 26 Monroe Street, Norwalk, CT 06854 Inquiry No.* 7903138.4. dated February 19, 2025. Specific maps reviewed included the United States Geological Survey (USGS): 7.5 Minute and 15 Minute quadrangle sheets for Norwalk including the years 1892, 1893, 1943, 1947, 1951, 1960, 1971, 1984, 2012, 2015, 2018, and 2021.

A summary table of the information reviewed from the Topographic Maps is provided below:

TOPOGRAPHIC MAP REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**SURROUNDING AREA**
1892	26 Monroe Street (Site/ Property) is mapped as undeveloped flat land.	A roadway is mapped to the west of the Site and north of the Site. The roadways appear developed with buildings. Two railroads are noted to the south east of the Site.	To the east of the railroad, the area is a combination of streets developed with buildings followed by the Norwalk River. North of the Site/ Property is mapped as roadways and buildings . South of the Site/ Property is a portion of the railroad and another branch toward the Norwalk River. West of the site are roadways with buildings and undeveloped land. The elevation increases toward the west and is sloping towards the Site/ Property.
1893	The Site/ Property remains similar to the 1892 Topographic Map.	No Site/ Property remains similar when compared to the 1892 topographic map.	No significant changes to the surrounding areas compared to the 1892 topographic map.
1943	The Site/ Property is mapped as built up. No buildings are mapped at the Site. A roadway Monroe Street runs north-south through the central-eastern portion of the Site.	The area around the Site/Property is mapped as built-up. The South Norwalk Train Station is mapped to the southeast of the Site. No significant changes to the abutting properties compared to the 1893 map	Southeast of the Site/ Property is mapped as built up. Schools are mapped to the southeast of the Site. Norwalk River/ Norwalk Harbor is improved with multiple buildings however this is downgradient of the Site/ Property. The western upgradient surroundings properties are improved with various structures and dwellings. North and south of the site are improved with school buildings and three other rectangular buildings along roadways.

TOPOGRAPHIC MAP REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**SURROUNDING AREA**
1947	No significant changes to the Site/ Property when compared to the 1943 topographic map./	No significant changes to the off-site adjoining properties compared to the 1943 topographic map.	No significant changes to the surrounding area when compared to the 1943 topographic map.
1951	A commercial-type structure is mapped on the southeast corner of the Site/ Property. This appears to be the Krest Mfg. Co. based upon the 1950 Sanborn Map.	An apparent train platform was noted to the southeast of the Site.	The surrounding area is improved with various structures to the northeast, southeast and south and east. Additional built up areas are noted to the northwest and south of the Site. Circular tanks for oil and gasoline storage are noted along the shoreline of the Norwalk River to the east.
1960	No significant changes to the Site/ Property when compared to the 1951 topographic map.	No significant changes to the abutting properties when compared to the 1951 topographic map.	No significant changes to the surrounding area when compared to the 1951 topographic map.
1971	No significant changes to the Site/ Property when compared to the 1960 topographic map.	No significant changes to the off-Site/ adjoining properties when compared to the 1960 topographic map.	No significant changes to the surrounding area when compared to the 1960 topographic map.
1984	No significant changes to the Site/ Property when compared to the 1971 topographic map	No significant changes to the off-Site adjoining properties compared to the 1971 topographic map.	Additional buildings are noted to the north of the Site/ property. No significant changes to the surrounding area when compared to the 1971 topographic map.
2012	The building in the southern portion of the Site is absent. Maps are significantly less detailed when compared to the 1984 topographic map elevations remain unchanged compared to the 1984 topo map	No significant changes to the off-site adjoining properties compared to the 1984 topographic map; however, the topographic maps are mapped at less detail than the 1984 Topographic Map.	No significant changes to the surrounding area compared to the 1984 map; however, the topographic maps are mapped at less detail than the 1984 topographic map.
2015 2018 2021	No significant changes to the Site compared to the 2012 topographic map.	Maps are significantly less detailed compared to 2012 and previous map. Elevations remain unchanged compared to the 2012 topographic map	No other significant changes to the surrounding area compared to the 2012 topographic map.

Copies of the topographic maps are included in ***Appendix A***.

3.3 Aerial Photographs

Aerial photographs were obtained by Eagle via EDR through their Aerial Photo Decade Package sourced from various state and Federal collections and provided in EDR's The Aerial Photo Decade Package, *26 Monroe Street, Norwalk, CT Inquiry No7903138.8* dated February 19, 2025. Aerial photographs reviewed were for the years 1934, 1949, 1958, 1960, 1963, 1971, 1979, 1991, 2006, 2010, 2014, and 2019.

A summary table of the information reviewed from the Aerial Photographs is provided below:

AERIAL PHOTOGRAPHY REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**SURROUDING AREA**
1934	26 Monroe Street (Site/ Property) is developed with to seven dwellings on the western border of the Site. The central portion of the Site is undeveloped. The Eastern portion of the Site is developed with four buildings (residential dwellings) based upon Sanborn Map information. A rectangular commercial building is mapped along the Southern Portion of the Site. A roadway (Monroe Street) is located in the eastern portion of the Site.	Roadways abut the Site/ Property on each side of the Site. A large building (power plant) is located to the south of the Site. Railroad tracks and a rectangular railroad platform are mapped to the southeast/ east of the Site. A roadway followed by dwellings are noted to the west of the Site. A combination of apparent dwellings and commercial type buildings are noted to the north and northeast of the Site. Railroad tracks are mapped to the east and southeast of the Site.	North of the site is improved with a mix of commercial and residential buildings and associated roadways . East of the site following the abutting roadways is a railroad tracks and associated buildings followed by residential and commercial buildings and associated roadways South-east of the site following the butting roadway is a portion of the railroad and associated parking lot followed by residential type buildings. South-west of the site / Property following the abutting roadway is a West of the site following a series of dwellings is a large open space and a series of residential structures and associated roadways North of the site is a mixture of residential and commercial building with associated roadways and parking areas

AERIAL PHOTOGRAPHY REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**SURROUDING AREA**
1949	The south-central portion of the site has been improved with a large square building attached to the previously mentioned rectangular structure No changes to residential structures along the western border compared to the 1934 aerial photo A large square building is noted on the eastern portion of the Site.	No significant changes compared to the 1934 aerial photograph.	No significant changes to the surrounding area compared to the 1934 aerial photograph.
1958	A square-shaped building is present inf northern portion of the Site.	No significant changes to the off-Site abutting properties compared to the 1949 aerial photograph.	No significant changes to the surrounding area compared to the 1949 aerial photograph.
1960	An apparent No other significant changes to the site compared to the 1949 aerial photograph.	No significant changes to the off-site abutting properties compared to the 1958 aerial photograph.	No significant changes to the surrounding area compared to the 1958 aerial photograph.
1963	Aerial photo is too light/pixilated to assess changes to the site compared to the 1960 aerial photograph.	Aerial photo is too light/pixilated to assess the changed to the abutting property compared to the 1960 aerial photograph.	No significant changes when compared to the 1960 aerial photograph; however, the photo is too light/pixilated to assess the changed to the surrounding property compared to the 1960 aerial photograph.
1971	The Site is improved with one "T" shaped building (Current building) and associated parking lot. The eastern portion of the Site is developed with a parking lot.	The area to the north of the Site/ Property is developed with residential type-buildings. A parking garage is noted to the south of the east of the Site. Houses along the western roadway (Martin Luther King Boulevard) are absent. No significant changes to the off-site abutting properties compared to the 1963 aerial photo	North of the site has been improved with ten square residential buildings followed by a series of large commercial buildings (according to Sanborn maps). The houses are absent along the western side of Martin Luther King Jr. Boulevard. Additional development is No other significant changes to the surrounding area compared to the 1963 aerial photo

AERIAL PHOTOGRAPHY REVIEW			
YEAR	**SUMMARY (ON-SITE PROPERTY)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**SURROUDING AREA**
1979	The Site/ Property remains relatively unchanged when compared to the 1971 aerial photo; A possible building is noted on the northern side of the building. However, the northeastern corner of the site cannot be accessed due to photo quality. Aerial photograph is pixelated, making it difficult to assess detailed changes.	No significant changes to the off-Site abutting properties compared to the 1971 aerial photo; however, aerial photograph is pixelated making it difficult to assess detailed changes.	No significant changes to the surrounding area compared to the 1971 aerial photo; however, aerial photograph is pixelated making it difficult to assess detailed changes.
1991	No other significant changes to the Site/ Property when compared to the 1979 aerial photographs.	No significant changes to the off-site abutting properties compared to the 1991 aerial photograph.	Additional development is noted to the southeast of the railroad station. Three square buildings are noted. Otherwise, no significant changes to the surrounding area compared to the 1979 aerial photo
1996	No significant changes to Site/ Property when compared to the 1991 aerial photographs	A parking garage is mapped to the southeast of the Site.	No significant changes to the surrounding area compared to the 1991 aerial photograph.
2006	No significant changes to the Site / Property when compared to the 1996 aerial photograph.	No significant changes to the off-Site abutting properties compared to the 1996 aerial photograph.	No significant changes to the surrounding area compared to the 1996 aerial photograph.
2010	No significant changes to the Site/ property compared to the 2006 aerial photograph	No significant changes to the off-Site abutting properties compared to the 2006 aerial photo	No significant changes to the surrounding area compared to the 2006 aerial photograph.
2014 2018	No significant changes to the Site/ Property when compared to the 2010 aerial photo.	No significant changes to the off-site abutting properties compared to the 2010 aerial photo	No significant changes to the surrounding area compared to the 2010 aerial photo

Copies of the aerial photographs are included in ***Appendix A***.

3.4 City Directories

City directories from 1964, 1971, 1977, 1966, 1992, 1995, 2000, 2005, 2014, 2017, and 2020 were obtained from the EDR Digital Archive and Price & Lee's City Directory and were provided in *The EDR-City Directory Image Report, 26 Monroe Street, Norwalk, CT Inquiry No. 7903138.5* dated February 20, 2025.

A summary of the information reviewed from the City Directories is provided below:

CITY DIRECTORY REVIEW			
YEAR	**SUMMARY (ON-SITE)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**CONCERNS**
1964	26 Monroe is listed as various residential tenants, Norwalk Typographers, Inc. Terrace Coffee Shop. State Street (no address) Krest Manufacturing Co. Inc. (Plastic Products	24 Monroe Street: Residential Listings. Monroe Street (No Address)- NHRR Station, Union News, Vicks Parking Lot, Fairfield Trust Co. 30 Monroe Street to the east-southeast of the site is listed as vacant State Street (no address)- South Norwalk Electric Works , Second Taxing District, Board of Electrical Commissioners.	Krest Manufacturing Co. Inc. (Plastic Products South Norwalk Electrical Works (Adjacent)
1971	26 Monroe Street is listed as Housing Authority of Norwalk. Multiple residential listings.	24 Monroe Street: Residential Listings. PC RR Station, Vicks Parking Lot. 25 Towne House Gardens Apartments. 20 State Street-South Norwalk Electric Works , Second Taxing District, Board of Electrical Commissioners.	South Norwalk Electrical Works (Adjacent)
1977	26 Monroe Street is listed as Housing Authority of Norwalk and individual tenants	24 Monroe Street: Residential Listings. Penn Central Transportation 25 Towne House Gardens Apartments. State Street-South Norwalk Electric Works Board of Electrical Commissioners.	South Norwalk Electrical Works (Adjacent)
1986	26 Monroe Street is listed as individual tenants	24 Monroe Street: Residential Listings. Penn Central Transportation 25 Towne House Gardens Apartments. The southern properties are listed as State Street-South Norwalk Electric Works	South Norwalk Electrical Works (Adjacent)
1992	26 Monroe Street is listed as individual tenants/ Darien Housing Authority	24 Monroe Street: City Housing Authority Drug Line, Toro Welding 25 Monroe Street Residential Listings, DAB Cleaning Services	None
1995	26 Monroe Street is listed as individual tenants.	24 Monroe Street: City Housing Authority Drug Line, Multiple Residential listing.	None
2000	26 Monroe Street is listed as individual tenants	24 Monroe Street: Norwalk City Social Services, Van Buren Cleaners, South Norwalk Community Police Center 25 Monroe Street: Multiple residential listings, Q Carpet Cleaning Services. 1 State Street: Norwalk City of- Electric Utilities, Sono Parking Garage, Summit Bank.	Van Buren Cleaner (Adjacent)

CITY DIRECTORY REVIEW			
YEAR	**SUMMARY (ON-SITE)**	**SUMMARY (OFF-SITE PROPERTY ADJOINING)**	**CONCERNS**
2005	26 Monroe Street is listed as individual tenants	24 Monroe Street: Residential listing, Sono Station Café, Tuesday Maze Boutique, Drug Hotline Duct & Vent Cleaning America 25 Monroe Street: Multiple residential listings. 1 State Street: South Norwalk Electric Works, LAZ Parking Inc., Summit Bank.	South Norwalk Electrical Works (Adjacent)
2010	26 Monroe Street is listed as individual tenants	24 Monroe Street: Sono Station Café, Drug hotline, Tuesday Maze Boutique, Duct & Vent Cleaning America, Van Buren Cleaners 25 Monroe Street: Multiple residential listings. 1 State Street: LAZ Parking LTD.	Van Buren Cleaners (adjacent)
2014	26 Monroe Street is listed as individual tenants and Associates for Training & Development	24 Monroe Street: Sono Station Café, Tasty Pizza, Monroe Emergency Plumbing, Drug hotline, Design Factor, City of Norwalk American Locksmith, All Star Carting Company, Tuesday Maze Boutique, Duct & Vent Cleaning America 25 Monroe Street: No listing. 1 State Street: No listing. No listings for the offsite abutting properties for this year	None
2017	26 Monroe Street is listed as individual tenants and Associates for Training & Development	24 Monroe Street: Sono Station Café, Tasty Pizza, Monroe Emergency Plumbing, Design Factor, City of Norwalk American Locksmith, All Star Carting Company, Tuesday Maze Boutique, Drug Hotline 25 Monroe Street: No listing. 1 State Street: No listing.	None
2020	26 Monroe Street is listed as individual tenants and Associates for Training & Development	24 Monroe Street: Design Factor, All Star Carting Company, Cedarwood Court, LLC, Electric Chargin Station, Fashion Lab Summer Camp, New England Design and Fashion, City of Norwalk Maintenance, Norwalk Housing Authority, Tuesday Maze Boutique 25 Monroe Street: No listing. 1 State Street: Second Taxing District, South Norwalk Electric Work, Norwalk Water.	South Norwalk Electrical Works (Adjacent)

Copies of the city directories are included in ***Appendix A***.

3.5 Site History Summary

Prior to the construction of the current apartment building in 1968, the Site initially consisted of residential dwellings that were constructed beginning circa 1889 through 1906. By 1934 the southern portion of the Site is developed with a manufacturing building. In 1950 the building and associated warehouse addition, are noted along the south eastern portion of the Site. In 1958, the building was noted as the Krest Manufacturing Company. A portion of a tin shop was located on the northern portion of the Site. Lumber Storage was noted in a building along the northern portion of the Site.

A roadway (State Street) runs north to south on the site with undeveloped land behind the western residential dwellings. The Site has remained unchanged since the construction of the current four-story residential apartment building.

Site history documentation is provided in ***Appendix A***.

4.0 Geology and Hydrology

4.1 Surficial Geology

According to the DEEP Surficial Materials Map of Connecticut (Stone 1992) accessed from the CT Environmental Conditions Online (CT ECO) website, the materials underlying the Site are mapped with multiple soil units including coarse sand and gravel associated with glaciofluvial deposits graded to sediment dammed lakes.

4.2 Bedrock Geology

The *1985 Bedrock Geological Map of Connecticut* indicates that bedrock beneath the Site consists of Trap Falls Formation and Ordovician granitic gneiss undivided.

4.3 DEEP Groundwater Classification and Hydrology

According to the CT DEEP Water Quality Classifications Map of Connecticut (2018), the Site has a class GB groundwater classification. Groundwater classified as GB is designated for use as industrial process water and cooling waters, and as baseflow for hydraulically connected water bodies. GB groundwater is presumed to not be suitable for human consumption without treatment.

The direction of groundwater flow within the surficial geological unit is influenced by a number of factors, including the physical characteristics of the soil and the local topography, the presence of surface water bodies, the depth to bedrock, and the type of aquifer. For an unconsolidated, unconfined aquifer, groundwater generally flows in the direction of the greatest topographic gradient. Eagle reviewed the area topography as it relates to the Site and determined an inferred direction of groundwater flow through the Site and adjacent area to be easterly, toward the Long Island Sound.

4.4 DEEP Surface Water Classification

The nearest USGS-mapped surface water to the Site/ Property is Norwalk Harbor which is located approximately 2,122 feet east of the Site. According to the DEEP Water Quality Classifications Map o, f Connecticut (2018), the DEEP has classified the Long Island Sound in the vicinity of the Site as a Class SB marine surface water. Designated uses for Class SB surface waters include marine fish, shellfish and wildlife habitat; shellfish harvesting for transfer to approved areas for purification prior to human consumption; recreation; and industrial and other legitimate uses including navigation.

4.5 Wetlands and Flood Plain Information

No wetlands are mapped at the Site based upon EDR information provided in *The EDR Radius Map™ Report with Geocheck® 26 Monroe Street, Norwalk, CT Inquiry No. 7903138.2s dated February 19, 2025*. Based upon the EDR and FEMA National Flood Hazard Map, the Site is located within an area of minimal flood hazard X (FEMA Map 0900C0531G effective 7/8/2013).

A copy of the EDR report and FEMA Flood Hazard map are provided in ***Appendix B*** and ***Appendix C***, respectively.

5.0 REGULATORY REVIEW

5.1 Federal and State Environmental Databases

5.1.1 Introduction

Eagle retained Environmental Data Resource, Inc. (EDR) of Shelton, Connecticut to perform an on-line radius search (based on AAI standards) of applicable State and Federal environmental databases. The EDR Radius Map ™ Report *26 Monroe Street, Norwalk, CT Inquiry No. 7903138.2s dated February 19, 2025*. (see ***Appendix B***), reviewed the following databases for the area within the specified radius of the subject Site:

Information Source	Search Distance
Federal Files	
National Priorities List (NPL)	1 mile
USEPA NPL Delisted Sites	1 mile
Resource Conservation and Recovery Act (RCRA) CORRACTS list (RCRA Site Subject to Corrective Action)	1 mile
Tribal Lands (boundaries within which recognized tribes have primary governmental authority)	1 mile
Resource Conservation and Recovery Act (RCRA) Treatment, Storage or Disposal Facility (TSDF) List	0.5 mile
Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) List, including No Further Remedial Action Planned (NFRAP) sites	0.5 mile
Federal Institutional / Engineered Control List	0.5 mile
RCRA Generators List	0.25 mile
Emergency Response and Notification (ERNS) List	property only
State Files	
Hazardous Waste Site List (State sites equivalent to NPL)	1 mile
Hazardous Waste Site List (State sites equivalent to CERCLIS)	0.5 mile
Landfill and Solid Waste Site	0.5 mile
Leaking Underground Storage Tank (LUST) List	0.5 mile
State Voluntary Clean-up or Brownfield Sites	0.5 mile
Oil & Chemical Spills Database	0.5 mile
Registered Underground Storage Tank (UST) List	0.5 mile
State Institutional / Engineered Control List	0.5 mile
State Other (includes CT Property Transfer Program sites)	0.5 mile

Based on the inferred direction of groundwater flow at the Site easternly, properties within the search radii specified above that are located to the east and upgradient of the Site were considered as they relate to potential offsite sources of contamination. The location of the Site is depicted on the Site Location Map provided as ***FIG-1.***

5.1.2 Site Regulatory Listings

The Site/ Property are not listed in EDR's database.

5.1.3 Area Regulatory Listings

Several properties were identified in State and Federal regulatory databases listed above within the specified search radii. Based on distance or direction from the Site, the properties generally are not considered to have any significant potential to adversely impact soil or groundwater quality at the Site. The following database listings were evaluated as being of potential interest relative to the Site:

South Norwalk Electric & Water, 1 State Street, located 0.002 miles south-southwest of the Site

- UST Finder Database Listing. The database noted that there are two open USTs and three closed UST listings. One 2000-Gallon diesel UST CT103-7369_TK-4and One 4,000-gallon gasoline UST CT103-7369_TK-5 that were installed in June 29, 1999 are listed as open. Three closed USTs are noted for the property: a 15,000-gallon gasoline UST. 5000-gallon gasoline UST and 30,000-gallon Gasoline UST identified as CT103-7369_TK-1, TK-2 and TK-3 respectively.
- CT UST – A CT UST listing is noted for a 40,000-gallon single-walled STIP-3 that was used for on-site heating oil. The UST is listed as temporary closed. A Notice of Violation (NOV) [NOVUST-GB17-0050] was issued for the Site because greater than 1-inch of product remained in a UST. Additional NOVs were issued for UST compliance related issues.

- CT MANIFEST reported in 2017 for one Drum of 2,214 pounds of PCB contaminated electrical equipment
- RCRA- VSQG- A RCRA very small quantity generator (VSQG)/ conditionally exempt generator is noted for the South Norwalk Electric Works for ignitable waste.
- CT LWDS- A Leachate and Wastewater listing (7000075) is noted for the South Norwalk Electric Works on State Street. The listing was identified for a previous discharge to the ground. The status is listed as inactive.
- PADS- A PCB Activity Database System listing is noted for the Property.
- Stat Hazardous Waste Site (SHWS)/ Site Discovery Assessment Database (SDADB)- The listing reports that two drums with pesticides were noted as buried at the parcel. A 1981 EPA Notification form noted that two underground storage drums were used for the storage of pesticides and tar remover. However, two drums were actually aboveground. The Site was inventoried as a Superfund Site on July 6, 1987.

21 & 22 Monroe Street , located 0.022 miles east-northeast of the Site

- Brownfield- Site is listed as an EPA-funded Brownfield Project for the completion of a Phase I ESA.

South Norwalk Train Station, 30 Monroe Street , located 0.022 miles east-northeast of the Site

- Brownfield- Site is listed as an EPA-funded Brownfield Project. No additional information is provided.

South Norwalk Train Station, 30 Monroe Street , located 0.022 miles east-northeast of the Site

- Brownfield- Site is listed as an EPA funded project/ DECD brownfield to the Norwalk Redevelopment agency. The Site was noted for poly cyclic aromatic hydrocarbons (PAHs), lead and petroleum products and volatile organic compounds (VOCs) in soil and groundwater.
- CPCS- A listing is noted for a CPCS for the Brownfield listing provided above.

Norcon Terminal, 24 Monroe Street , located 0.057 miles east- of the Site

- UST Listing- A listing for a 1,000-gallon gasoline UST (N-1) and a 2,000-gallon diesel UST (N-2), a 6,000-gallon diesel UST, 10,000-gallon diesel UST (N-4)that was removed from the ground and permanently closed and removed from the Site.
- UST Finder- A UST finder listing listed the Norcom Terminal. This appears to relate to the UST listings above.

Ms. Penny Aslanidis, 15 Madison Street. located 0.065 miles to the east southeast of the Site.

- CT LUST- A LUST listing is noted for the South Norwalk Gardens Association that is associated with case ID 20101979. The record indicates it was associated with a UST that is greater than 2,100 gallons.
- CPCS listing is noted for the LUST listing is noted that the remediation is completed.

A search of the CTDEEP's Document Online Search Portal https://filings.deep.ct.gov/DEEPDocumentSearchPortal/ completed on March 18, 2025 revealed no additional documents were found for the Site. Off-site listings were encountered for spills that were associated with motor vehicle accidents located on Monroe Street and are closed. Based upon the nature of the spills, it is not anticipated that they will impact the Site.

5.2 Municipal File Review

Municipal office research performed as part of this Phase I ESA study is summarized in the sections below. Pertinent municipal files are provided in ***Appendix C***.

5.2.1 Tax Assessor

A property information summary was available from the Connecticut Assessor's Online Database https://gis.vgsi.com/NorwalkCT/Search.aspx and Nowalk GIS database web-site https://www.norwalkct.gov/1397/GIS-Mapping https://www.norwalkct.gov/1397/GIS-Mapping

The Site is developed with a 99,960- square foot, four story apartment building that was built in 1968. The building is heated by natural gas/ hot water. The building contain 49 apartments including efficiency, one and two bedroom apartments. The building contains an elevator. The Site includes a paved parking lot and grassed lawn area. An area of trees are located on the north eastern portion of the parcel. The Property is bisected the State Street roadway on the eastern portion of the Site followed by a one-story building and parking lot that is used by the Norwalk Housing Authority 24 ½ Monroe Street.

No historical property card information was provided during the Phase I ESA municipal review.

5.2.2 Building Department

Eagle visited the Norwalk building department as part of the Phase I ESA. No Information was encountered for the identification of RECs/ AOCs. Recent building permit information on the property assessor card for re-modeling activities.

5.2.3 Fire Marshal's Office

Eagle reached out to the Norwalk Fire Marshal's Office March 18, 2025. Eagle did not receive a respond to this request. A follow-up phone call and email were completed April 7, 2025. A response was not provided prior to issuing this Phase I ESA report.

Eagle completed a review of the City of Norwalk Oil Tank Look-up https://hub.norwalkct.gov/oiltank . No oil tanks were listed for 26 Monroe Street (Site/ Property). A 2,000-gallon #2 fuel oil UST was listed for 24 Monroe Street that was removed on April 28, 1997.

5.2.4 Health Department

The Eagle contacted the Norwalk Health Department via email March 17, 2025. Eagle received an email stating that no records were available in regard to environmental concerns on March 18, 2025.

5.2.5 Town Clerk's Office

The city of Norwalk's Clerk's Office was visited on March 7, 2025. A search for the Town Clerk's records did not reveal any documents for the Site/ Property. Eagle searched the city of Norwalk Town Clerk's office. No records were available for Book 735/ Page 352. The property card notes that the Site/Property was purchased on August 27, 1970.

6.0 USER PROVIDED INFORMATION

A User Questionnaire was completed by Ms. Lisa Endo, Vice President, for Norwalk Housing Authority. A summary of the information provided by Mr. Endo from the questionnaire is provided below. A copy of the questionnaire is provided in ***Appendix D***.

Note that a complete title search, valuation, and other real estate information are beyond the scope of work of this Phase I ESA.

Historical information is provided in ***Section 4.0***, ***5.0*** and ***6.0*** of this report. The information presented in this section was based primarily on the information collected from Mr. Endo.

6.1 Environmental Liens

The above-referenced individual indicated in the User Questionnaire that he is unaware of any environmental liens issued against the subject Site.

6.2 Environmental Land Use Restrictions

The above-referenced individual indicated in the User Questionnaire that he is unaware of any environmental land use restrictions that are in place at the Site or that have been recorded in public land records for the Site.

No EURs were listed for the site based upon a review of CTDEEP EUR GIS web site.

6.3 Specialized Knowledge

The above-referenced individual indicated in the User Questionnaire that she has no specialized knowledge or experience relating to the subject Site that would be relevant to identification of RECs.

6.4 Valuation Reduction for Environmental Issues

The above-referenced individual indicated in the User Questionnaire that she has no knowledge of any reduction in the market value of the property due to environmental concerns.

6.5 Commonly Known or Reasonable Ascertainable Information

The above-referenced individual indicated in the User Questionnaire that she is unaware of known or reasonable ascertainable information pertaining to the subject Site that would assist in identification of RECs.

6.6 Degree of Obviousness of Contamination

The above-referenced individual indicated in the User Questionnaire she is unaware of any obvious indicators that point to the presence or likely presence of contamination on the property.

6.7 Previous Reports

The User of this report did not provide any previous environmental investigation reports for Eagle to review.

7.0 INTERVIEWS

7.1 User

The User is typically interviewed about their knowledge of the Site during the Phase I ESA study. The User of the report, Ms. Lisa Endo, Vice President of Development for Sound Communities , referred Eagle to the User Questionnaire discussed in ***Section 6*** above.

7.2 Owner / Key Site Manager

Mr. Leroy Downs, the Director of Maintenance, was interviewed by Eagle via questionnaire. Information gathered from Mr. Downs is provided below and in other sections throughout this report. Ms. Downs indicated in response to the questionnaire that he has no prior knowledge of any ASTs or USTs on the Site. A positive response was provided for the question regarding the industrial use of an adjacent property. this appears to refer to the former power plant. Mr. Downs also noted that an adjacent property was used as a drycleaner motor or other commercial uses as noted in Appendix D. A copy of the Environmental Site Reconnaissance Questionnaire is provided in ***Appendix D***.

7.3 Interview with State and/or Local Officials

See Section 5.2. No information pertinent to identification of RECs/ AOCs was noted in local official interviews.

8.0 DATA GAPS

The following data gaps were identified during performance of the Phase I ESA:

- A response from the City of Norwalk Fire Marshal investigation was not received in time for this Report. Eagle completed a review of the City of Norwalk UST database. This is considered a data gap as there could be other available information for spills or other information that could aid in the identification of RECs/ AOCs. .
- The deed for the Property was not able to be located for the parcel. As such, a deed search was not completed as part of the Phase I ESA. This is considered a data gap for the Phase I ESA.

9.0 VAPOR ENCROACHMENT SCREENING

In 2010, ASTM international issued its revised Standard E2600-10 entitled "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." This standard guide has been adopted into the ASTM E1527-13 Phase I Environmental Site Assessment Standard. The purpose of the standard is to define good commercial and customary practice for real estate transactions in the United States for conducting a screening assessment directed solely at the likelihood for migrating vapors to encroach upon a target property (i.e. the Site) creating a vapor encroachment condition (VEC). The presence of vapors in a building that has migrated from a release to the environment (i.e. from a release outside of the building) can result in CERCLA liability. Thus, this screening serves to assess the likelihood of a VEC. Determining whether or not encroaching vapors result in a vapor intrusion problem requires further investigation that is beyond the scope of the standard.

A VEC is defined as the presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the Site caused by the release of vapors from contaminated soil or groundwater on or near the Site. An area of concern (AOC) as defined in the E2600-10 is measured 0.33-miles from the Site for known or suspect contaminated sites with volatile organic compound (VOC) or semi-VOCs; 0.1-mile from the Site for known or suspect petroleum hydrocarbon releases. The identification of AOCs may be reduced if the groundwater flow direction is known relative to the Site. Critical distances are taken into account for contaminated groundwater plumes in any direction for COCs including petroleum light non-aqueous phase liquid (LNAPL) accumulating above the water table at a distance of 100 ft. from the edge of the plume to the Site and 30 ft. for dissolved volatile petroleum hydrocarbons.

A Vapor Encroachment Screen (VES) was obtained by Eagle via EDR. The operation of the former Krest Plastic Manufacturing facility was noted on the site. Several nearby sources of underground petroleum , a historical dry cleaner, and former power plant were identified were identified in the vicinity. However, based on the VES assessment and the Site reconnaissance, there is a potential that a VEC may exist at the Site/ Property. A copy of the VES report is provided in ***Appendix A***.

10.0 CONNECTICUT TRANSFER ACT STATUS

The State of Connecticut Property Transfer Law (the "Transfer Act"), described in Sections 22a-134a through 22a-134e of the Connecticut General Statutes, requires the disclosure of environmental conditions when certain real properties and/or businesses are transferred. The law applies only to those properties that are deemed to be "establishments" as defined under the law. As defined by the Transfer Act, an establishment is:

> *… any real property at which or any business operation from which (A) on or after November 19, 1980, there was generated, except as the result of (i) remediation of polluted soil, groundwater or sediment, or (ii) the removal or abatement of building materials, more than one hundred kilograms of hazardous waste in any one month, (B) hazardous waste generated at a different location was recycled, reclaimed, reused, stored, handled, treated, transported or disposed of, (C) the process of dry cleaning was conducted on or after May 1, 1967, (D) furniture stripping was conducted on or after May 1, 1967, or (E) a vehicle body repair facility was located on or after May 1, 1967.*

Effective October 1, 2019, "Establishment" does not include any business operation from which more than one hundred kilograms of hazardous waste was generated in any one month solely as a result of either:

> *(i) The one-time generation of hazardous waste in any one month, as a result of either the first time such waste was generated or such a one-time generation since the last time a Form I, Form II, Form III or Form IV was required to be submitted; or*
>
> *(ii) One or more of the following:*
>
> *(I) Remediation of polluted soil, groundwater or sediment;*
>
> *(II) The removal or abatement of building materials or removal of materials used for maintaining or operating a building;*
>
> *(III) The removal of unused chemicals or materials as a result of the emptying or clearing out of a building, provided such removal is supported by facts reasonably established at the time of such removal; or*
>
> *(IV) The complete cessation of a business operation, provided the waste is removed not later than ninety days after such cessation and such cessation is supported by facts reasonably established at the time of such cessation.*

If the Site is determined to be an establishment, DEEP reporting and involvement may be required in order to transfer the property, and DEEP will require identification, delineation, and remediation of all environmental concerns in accordance with Connecticut's Remediation Standard Regulations.

This assessment did not reveal the presence of any conditions that would qualify the Site as an Establishment under the Transfer Act. However, a dry cleaner (Van Buren Cleaners) was noted at 24 Monroe Street in the 2010 City Directory Listing. The location of 24 Monroe Street is uncertain. If this is part of the Property then the property, including the Site, would be considered an Establishment. The location of the dry-cleaner is uncertain.

The applicability of the Transfer Act to a property is ultimately a legal decision, so legal counsel should be consulted if a definitive determination of Transfer Act status is desired.

11.0 FINDINGS AND CONCLUSIONS

Eagle prepared this Phase I ESA report in general conformance with the scope and limitations of ASTM Practice E1527-21. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report.

The major findings of the Phase I ESA are as follows:

- The Site is developed with a 99,960- square foot, four story apartment building that was built in 1968. The building contain 49 apartments including efficiency, one and two bedroom apartments units. The Site includes a paved parking lot and grassed lawn area. The Site is located on approximately 1.8 acres of the 2.18-acre property.
- The Property is bisected the State Street roadway on the eastern portion of the Site followed by a one-story building and parking lot that is used by the Norwalk Housing Authority 24 ½ Monroe Street.
- The current building on the Site were built in 1968. The Site is currently owned by Norwalk Housing Authority but has been historically occupied by various residential owners and the Krest Plastics manufacturer.
- The building is heated by natural gas/ hot water. Multiple gas-fired water heaters and boilers were observed in the boiler room in the two-story building.
- Historical Sandborn maps indicate that the former Krest Plastic manufacturer was noted
- No evidence of current or underground storage tanks (USTs) was observed on Site.
- A pad- mounted transformer was located on- Site. was located on the western portion of the Site. No staining or odors were noted.
- An aboveground hydrail elevator reservoir was identified on in the elevator reservoir tank and a reservoir tank for the garbage compactor. No staining or orders were encountered.
- No environmental records were noted for the Site.
- Several nearby properties with listed hazardous waste generation and/or underground storage tank and former power plant activity were identified. Based on distance from the Site and/or remediation documentation, these properties would not be expected to have impacted the Site.
- The presence of emerging compounds such as per- and polyfluoroalkyl substances (PFAS) or 1,4 dioxane is possible based upon the former operation of the plastics manufacturer at the Site.
- A Vapor Encroachment Screen (VES) was obtained by Eagle via EDR. Based on the VES assessment and the Site reconnaissance, a Vapor Encroachment Condition (VEC) is possible at the Site based upon operations for the former plastic manufacturer.
- Hazardous building materials (HBMs) and radon are not noted as Business Environmental Risk (EBR) based upon the building's use and age of the buildings.
- The Site area does not appear to qualify as qualify as an "Establishment" as defined by the Connecticut Transfer Act based upon information reviewed as part of the Phase I ESA. However, a Property may be classified as an Establishment if the dry cleaner (Van Buren Cleaners- 24 Monroe Street) was located on-Site at the current 24 ½ Monroe Street building. Additional information is needed to determine if the dry cleaner was located on-Site However, determining the applicability of the Transfer Act to a property is ultimately a legal decision, so legal counsel should be consulted if a definitive determination of Transfer Act status is desired.

This assessment has revealed two *Recognized Environmental Conditions (* RECs) and four *Areas of Concern* (AOCs) in connection with the Site. The RECs and AOCs are summarized on **FIG-3.**

- REC-1/ AOC-1- Former Krest Plastics Manufacturing Company
- REC-2/ AOC-2 Former Tin Shop
- AOC-3- Hydraulic Elevator AST
- AOC-4- Pad-mounted Transformer

A preliminary conceptual Site model (CSM) is provided below.

REC-1/ AOC-1 Former Krest Plastics Manufacturing Company

COCs: VOCs, SVOCs (phthalates), PFAS

The Site was historically developed for commercial use by 1934 based upon aerial photographs. The former Krest Plastic Manufacturing Company is mapped on the 1950 and 1958 Sanborn Maps prior to the development as the current housing authority development in the late 1960's. The chemical storage and use as part of the Krest Manufacturing Company for plastic finishing. If releases occurred, shallow soils under the building footprint could be impacted. If a significant spill/ release occurred then deeper soils and groundwater could be impacted. Once in groundwater, impacts would travel in the direction of groundwater flow to Norwalk Harbor.

REC-2/ AOC-2 Former Tin Shop

COC: Metals (tin)

A portion of a former tin shop was located on the northern portion of the Site in the 1958 Sanborn Map. The waste practices of the former tin shop is unknown. If releases occurred, then shallow subsurface soils could be impacted.

AOC-3 Hydraulic Elevator AST

COC's: VOCs, PAHs and ETPH

A hydraulic AST was observed in the first-floor elevator mechanical room. No stating was observed on or around the AST. If a release occurred, then the underlying concrete would be impacted. If preferential pathways are present, then soils beneath the concrete floor would be impacted. If a significant release or long duration release occurred, then deeper subsurface soils would be impacted.

AOC-4 Pad-mounted Transformers

COCs: ETPH and PCBs

The pad-mounted transformer is located on the north central portion of the Site. No staining was noted on the transformer pad. No historical spills are reported.

A release from a transformer would impact surrounding transformer pad and surrounding surficial soils. If a significant release occurred or a long duration leak, then deeper subsurface soils could be impacted.

Recommendations

A Phase II ESA would be needed to assess soil and groundwater conditions to determine if releases occurred at the REC and AOCs that could have impacted soil and groundwater at the Site.

Additional research is needed to assess whether the Property (Site) included the operations for the Van Buren Dry Cleaners at 24 Monroe Street was located at the Property. The 24 Monroe Street address is not on current tax assessor mapping.

Eagle has identified a business environmental risk with the possible presence of HBMs based upon the age of the buildings. A HBMA survey is recommended to be conducted prior to building renovations.

12.0 LIMITATIONS

This report and all associated work products provided in connection with the performance of this Phase I Site Assessment are subject to the following limitations.

The report was based on the observations of Eagle of the Site condition and a review of information provided by the state and local officials and information and representations made by other parties and on information contained in the files of State and/or local agencies made available to Eagle at the time of the Site assessment. To the extent that such files are missing, incomplete or not provided, Eagle is not responsible. Although there may have been some degree of overlap in the information provided by these various sources, Eagle did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this Phase I ESA.

The purpose of this report is to assess the observable characteristics of the subject Site with respect to the presence of potential environmental contamination, such as potentially hazardous waste or petroleum and chemical products and wastes as defined in Connecticut General Statutes section 22a-452. No specific attempt was made to check the compliance of present or past owners or operators of the Sites with Federal, State or local laws and regulations, environmental or otherwise.

Eagle's work presented herein was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and Eagle observed that degree of care and skill generally exercised by other consultants under similar circumstances and conditions. Eagle's findings and conclusions must be considered not as scientific certainties, but as a professional opinion concerning the significance of the limited data gathered during the course of the Program. Specifically, Eagle does not and cannot represent that the Sites contains no hazardous material, oil, or other latent condition beyond that observed by Eagle during preparation of this report.

14.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in "§312.10 of 40 CFR §312" and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Willey is a Licensed Environmental Professional (LEP) in Connecticut and a Professional Geologist (PG) in New York State and has over 24 years of environmental experience conducting Site assessments, field investigations, and remedial actions in Connecticut in New York and has a Bachelor of Science degree in Environmental Geology.

Lynn E. Willey, P.G., LEP

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Eagle Environmental, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SHWS list, as provided by EDR, and dated 04/23/2010 has revealed that there are 7 CT SHWS sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CT SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Inventory of Hazardous Disposal Sites.

A review of the CT SWF/LF list, as provided by EDR, and dated 06/01/2024 has revealed that there are 2 CT SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal institutional control / engineering control registries

CT ENG CONTROLS: An Engineered Control is a permanent physical structure designed to safely isolate pollutants which would otherwise not comply with the self-implementing remedial options allowed in the Connecticut Remediation Standard Regulations (RSRs). The ECGD includes a description of what is eligible to be considered as an Engineered Control under section 22a-133k-2(f)(2) of the RSRs, a description of the information necessary for the preparation of complete and approvable applications, a step-by-step outline of the review and approval process, and supplemental resources provided in the appendices.

A review of the CT ENG CONTROLS list, as provided by EDR, and dated 09/24/2024 has revealed that there are 2 CT ENG CONTROLS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

CT CPCS: A list of Contaminated or Potentially Contaminated Sites within Connecticut. This list represents the "Hazardous Waste Facilities," as defined in Section 22a-134f of the Connecticut General Statutes (CGS). The list contains the following types of sites: Sites listed on the Inventory of Hazardous Waste Disposal Sites; Sites subject to the Property Transfer Act; Sites at which underground storage tanks are known to have leaked; Sites at which hazardous waste subject to the RCRA; Sites that are included in EPA's (CERCLIS); Sites that are the subject of an order issued by the Commissioner of DEP that requires investigation and remediation of a potential or known source of pollution; and Sites that have entered into one of the Department's Voluntary Remediation Programs.

A review of the CT CPCS list, as provided by EDR, and dated 10/28/2024 has revealed that there are 52 CT CPCS sites within approximately 0.5 miles of the target property.

CT LWDS: The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP.

A review of the CT LWDS list, as provided by EDR, and dated 07/17/2009 has revealed that there is 1 CT LWDS site within approximately 0.25 miles of the target property.

CT SEH: The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

A review of the CT SEH list, as provided by EDR, and dated 03/31/2024 has revealed that there are 3 CT SEH sites within approximately 0.5 miles of the target property.

Running Comments:	Note that the State Site ID is the town ID(103) and the system ID(4102).One piece of correspondence from Water Remediation files received in October of 1996 from Metcalf & Eddy, Inc. of Wallingford CT, states that all 4k tanks (DF, gasoline) and 550 gallon HF2 tank were removed on 6/15/95. Others were removed in the past. GB-AREA. GW FLOW WSW TO ENE. It is not known whether gasoline contamination was noted in the excavation of the 4k's and 550. Historic insurance mapping identify 3 UST's located WSW of the building.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RYAN PARK (Continued) **S118695742**

SEH:
Name: CITY OF NORWALK - RYAN PARK
Address: 10 RAYMOND STREET
City,State,Zip: NORWALK, CT
Date Notified: 01/06/2017
Type Of Hazard: Pollution in the top two feet of soil may pose a risk to human health as a result of direct contact.
Response: DEEP reviewed information provided and determined that polluted soil posing a hazard has been rendered inaccessible eliminating the exposure risk. DEEP directed the property owner to provide annual updates until the hazard is permanently abated.
Actions: Soil with PCBs greater than significant hazard concentrations (15 mg/kg) excavated, removed and transported for off-site disposal. Soils with concentrations of PCBs greater than 1 mg/kg also removed for off-site disposal.

Name:	NORWALK HARBOR STATION HWM FACILITY
Address:	1 WOODWARD AVENUE
City,State,Zip:	NORWALK, CT
Date Notified:	11/17/1998
Type Of Hazard:	Pollution detected in groundwater that discharges to a surface water body may pose a risk to aquatic life.
Response:	Since this site is located on a major tidal water body, DEP determined that there is significant dilution of the groundwater emanating from

Actual:
2 ft.

NORWALK HARBOR STATION HWM FACILITY (Continued) **S111119841**

the site, thus DEP has determined the reported conditions do not represent a hazard condition.

Actions: No specific abatement action necessary.

Property Transfer Forms:	Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form (ECAF)(DEP-PERD-PTP-200).

Property Transfer Forms:	Form III (DEP-PERD-PTP-203) when a discharge, spillage, uncontrolled loss, seepage or filtration of hazardous waste has occurred at the parcel that has not been fully remediated or the environmental conditions at the parcel are unknown. The person signing the Form III certification agrees to investigate and remediate the site in accordance with the remediation standards. The statute does not require completion of remediation before the parcel is transferred. Any person submitting a Form III shall simultaneously submit a completed Environmental Condition Assessment Form (ECAF)(DEP-PERD-PTP-200).

SEH:

Name:	NORWALK COMPRESSOR COMPANY (FORMER)
Address:	20 NORTH WATER STREET
City,State,Zip:	NORWALK, CT
Date Notified:	02/27/2008
Type Of Hazard:	Pollution in the top two feet of soil may pose a risk to human health as a result of direct contact.
Response:	DEP reviewed information provided and determined that the polluted soil is under a building, limiting the potential for contact; and remediation to remove the soil is scheduled for 2008.
Actions:	maintain security till remediated, send letter report of hazard removal (separate from RAR)

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/16/2024

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Inventory of Hazardous Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

LWDS: Connecticut Leachate and Wastewater Discharge Sites

The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

SEH: List of Significant Environmental Hazards Report to DEEP

The Significant Environmental Hazard Statute is intended to identify and abate short-term risks associated with specific environmental conditions identified in the statute. After abatement of short-term risks (meaning abatement of the significant environmental hazard condition), there may still be potential long-term risks associated with the release. However, a significant environmental hazard can be considered abated under the statute even though potential long-term risks may not have been addressed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

26 MONROE STREET
26 MONROE STREET
NORWALK, CT 06854

TARGET PROPERTY COORDINATES

Latitude (North):	41.096263 - 41° 5' 46.55''
Longitude (West):	73.422683 - 73° 25' 21.66''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	632467.4
UTM Y (Meters):	4550430.0
Elevation:	11 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	20023978 NORWALK SOUTH, CT
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

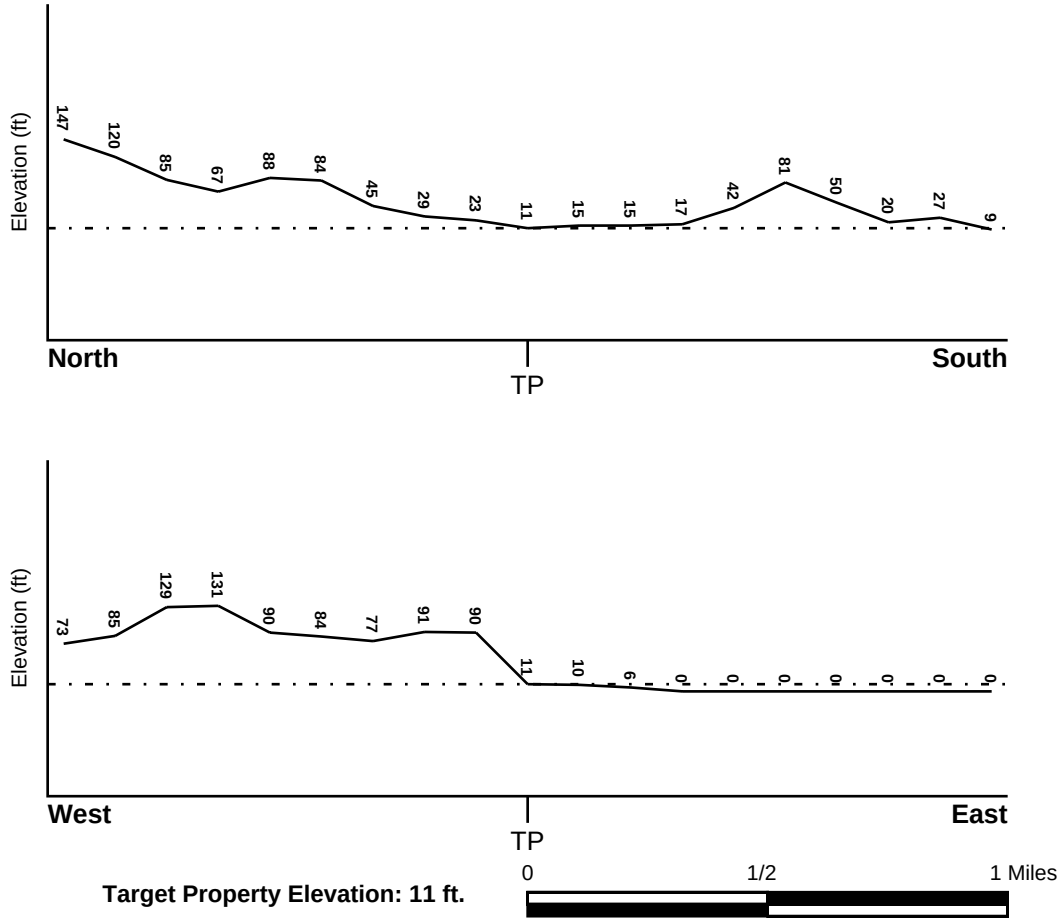
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 11 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
09001C0531G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
09001C0527F	FEMA FIRM Flood data
09001C0532G	FEMA FIRM Flood data
09001C0529G	FEMA FIRM Flood data

09001C0534G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NORWALK SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSE
Site Name:	HOWE FURNITURE CORPORATION
Site EPA ID Number:	CTD001162858
Groundwater Flow Direction:	S TOWARD THE ATLANTIC OCEAN.
Measured Depth to Water:	not available, but expected to be shallow.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Ground water at the site is classified as GA by the Connecticut DEP.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: material

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Tidal Wetlands
Source: Department of Energy & Environmental Protection
Telephone: 860-424-4054

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Community and Non-Community Water System Wells
Source: Department of Public Health, Water Supplies Section
Telephone: 860-509-7333
Active, emergency and inactive wells used for potable purposes that are owned and operated by active community and non-community water systems in Connecticut.

Wells in Connecticut Listing
Department of Consumer Protection
Telephone: 860-713-6022
Water wells located in the state of Connecticut.

OTHER STATE DATABASE INFORMATION

Connecticut Leachate and Wastewater Discharge Sites
Source: Department of Environmental Protection
Telephone:
The Leachate and Waste Water Discharge Inventory Data Layer (LWDS) includes point locations digitized from Leachate and Wastewater Discharge Source maps compiled by the Connecticut DEP. These maps locate surface and groundwater discharges that (1) have received a waste water discharge permit from the state or (2) are historic and now defunct waste sites or (3) are locations of accidental spills, leaks, or discharges of a variety of liquid or solid wastes.

EPA-Approved Sole Source Aquifers in Connecticut
Source: EPA
Telephone:
Sole source aquifers are defined as an aquifer designated as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for the area and for which there are no reasonable alternative sources should the aquifer become contaminated.

RADON

State Database: CT Radon

Action:	Soil Removed
Other Action:	Not Reported
Agency ID:	DEP Dispatch
Other Agency:	Not Reported
DEP Bureau:	Not Reported
DEP Agency:	Not Reported
Cause ID:	Inground Tank Failure
Other Cause:	Not Reported
Media ID:	Other
Other Media:	SUBSURFACE SOIL CONTAMINATION
Release Type:	petroleum
Other Release:	Not Reported
Waterbody:	Other
Other Wtrbody:	NA

CPCS: Other Ascertainable Records

Name:	SANTALUCIA RES.

SANTALUCIA RES., 41 HOLLOW TREE RD., NORWALK, CT 06856 (Continued)

Address:	41 HOLLOW TREE RD.
City,State,Zip:	NORWALK, CT 06856
Site Type:	Not Reported
Lust Status code:	4
Lust Status:	Lust Completed (DEP's significant hazard definition)
PTP Form:	Not Reported
Program:	LUST
Comments:	#2 Heating Oil, , Removed 275 Ust, Soil Removal
Site Type Definition:	Leaking Underground Storage Tanks Completed
Invesigation Start:	Yes
Invesigation Start Date:	Not Reported
Remediation Start:	Yes
Remediation Start Date:	Not Reported
Remediation Completed:	Yes
ELUR:	Not Reported
Date Data Updated:	09/29/1997

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 2/19/2025 at 7:33 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

WATER QUALITY CLASSIFICATIONS
NORWALK, CT

SURFACE WATER QUALITY CLASSES

A	A
AA	AA
B, B*	B, B*
SA	SA
SB	SB

NOTES:
Surface Water Classifications beginning with S refer to Coastal and Marine Surface Water.
B* is a subset of Class B where no direct wastewater discharges are allowed other than those consistent with Class AA, A and SA surface waters.

GROUND WATER QUALITY CLASSES

GA (white background)

GAA, GAAs

GA, GAA may not meet current standards

GB

GC

Area of Contribution to Public Supply Well

Final Aquifer Protection Area (Level A)

Major Basin Boundary

EXPLANATION

WATER QUALITY CLASSIFICATIONS (WQC) MAPS are one of the elements of the Water Quality Standards (WQS) for the State of Connecticut. The WQS are a part of Connecticut's clean water program and are essential for protecting and improving water quality. The WQS follow the principles of Connecticut's Clean Water Act which is in Chapter 446K of the Connecticut General Statutes. The WQS provide policy guidance in many areas, for example decisions on acceptable discharges to water resources, siting of landfills, remediation or prioritization of municipal sewerage system projects. The first two elements of the WQS are the Standards, which set an overall policy for management of water quality, and the Criteria, which are descriptive and numerical standards that describe the allowable parameters and goals for various water quality classifications. A discussion of these two elements is found in the Water Quality Standards document available on the CT DEEP website. The third element is the Classifications and the Water Quality Classification Maps which show the Classification assigned to each surface and groundwater resource throughout the State. The WQS are adopted using a public participation process. The WQC maps are also adopted using a public participation process but go through hearings separately from the Standards and Criteria hearings. Revision and adoption of the WQC data occurs in accordance with the public participation procedures contained in Section 22a-426 of the Connecticut General Statutes. Ground WQC is subject to Connecticut regulation and changes must be reviewed and adopted. All changes to the Surface WQC require an adoption process which is subject to federal review and approval in addition to CT regulation. The adoption dates for the WQC by major drainage basin are: Housatonic River, Hudson River and Southwest Coastal Basins - March 1999; Connecticut River and South Central Coastal Basins - February 1993; Thames River, Pawcatuck River and Southeast Coastal Basins - December 1986. Surface Water Classifications do not change after the adoption date until the next major revision. Ground Water Classifications may change after the adoption date under specific circumstances. The map may have more than one WQC adoption date because a town may be in more than one major drainage basin.

SURFACE WATERS in Connecticut are divided into freshwater classified as AA, A, B or B* and saline waters classified as SA or SB. Class AA designated uses are existing or proposed drinking water supplies; habitat for fish and other aquatic life and wildlife; recreation; and water supply for industry and agriculture. Class A designated uses are habitat for fish and other aquatic life and wildlife; potential drinking water supplies; recreation; navigation; and water supply for industry and agriculture. Class SA designated uses are habitat for marine fish, other aquatic life and wildlife; shellfish harvesting for direct human consumption; recreation; industrial water supply; and navigation. Class B designated uses are habitat for fish and aquatic life and wildlife; recreation; navigation; and industrial and agricultural water supply. Class B*, applicable to Candlewood Lake, is a subset of Class B and is identical in all ways to the designated uses, criteria and standards for Class B waters except for the restriction on direct discharges. Class SB designated uses are habitat for marine fish and aquatic life and wildlife; commercial shellfish harvesting; recreation; industrial water supply; and navigation.

Surface waters which are not specifically classified shall be considered as Class A or Class AA. Surface waters in GA ground water areas are assumed Class A or Class SA unless otherwise indicated. Surface waters in GAA ground water areas are assumed Class AA unless otherwise indicated.

On the WQC map a surface water quality goal of A is represented by blue colored water bodies. Surface water quality goal of AA is represented by purple colored water bodies. Surface water quality goal of B is represented by gold colored water bodies.

GROUND WATERS in Connecticut are classified as GAA, GA, GB and GC. Class GAA designated uses are existing or potential public supply of water suitable for drinking without treatment and baseflow for hydraulically-connected surface water bodies. The Class GAAs is a subclass of GAA for ground water that is tributary to a public water supply reservoir. The area of contribution to a public water supply well is represented by a 500-foot radius around the well and is assumed to be Class GAA unless otherwise classified. Class GA designated uses are existing private and potential public or private supplies of water suitable for drinking without treatment and baseflow for hydraulically-connected surface water bodies. All ground waters not specifically classified are considered as Class GA. Class GB designated uses are industrial process water and cooling waters and baseflow for hydraulically-connected water bodies and is presumed not suitable for human consumption without treatment. Class GC designated uses are assimilation of discharges authorized by the Commissioner pursuant to Section 22a-430 of the General Statutes.

On the WQC map GA is represented by white colored land areas. Class GAA and class GAAs are represented by blue colored land areas. The area of contribution to a public water supply well is shown by a blue cross-hatch overprint. A notation of GAA followed by a state abbreviation indicates a watershed that contributes to the public water supply for a state other than Connecticut. Class GA or Class GAA areas that currently may not be meeting the GA or GAA standards are represented on the WQC maps by tan colored land areas. Class GB is represented by green colored land areas. Class GC is represented by magenta colored land areas.

FINAL AQUIFER PROTECTION AREAS (Level A) are included on the WQC maps for informational purposes. These areas are anticipated to be reclassified GAA during the next major basin updates, subject to public participation. The Aquifer Protection Program helps protect Connecticut's public drinking water resources by delineating aquifer protection areas (also called wellhead protection areas) for public supply wells and establishing land use regulations within these areas. These areas represent the land area contributing ground water to active public water supply wells or well fields that serve more than 1000 people and are set in sand and gravel aquifers (stratified drift deposits).

DATA SOURCES

WATER QUALITY CLASSIFICATIONS DATA – Water quality classifications shown on this map are based on information from the following digital spatial datasets that are typically shown together – Ground Water Quality Classifications Poly, Surface Water Quality Classifications Line, and Surface Water Quality Classifications Poly. The map legend above reflects the content of these three data sources. These WQC data were initially compiled on 1:24,000-scale 7.5 minute USGS topographic quadrangle maps and later digitized at 1:24,000 scale. For example, the Surface Water Quality Classifications Line and Surface Water Quality Classifications Poly digital data assigns surface water quality classifications to water bodies such as rivers, streams, reservoirs, lakes, ponds and coves found in 1:24,000-scale hydrography data available from CT DEEP. The hydrography may not include all the waterbodies in Connecticut. The Ground Water Quality Classifications Poly data assigns ground water quality classifications, at 1:24,000 scale, to the remaining land areas in Connecticut.

AQUIFER PROTECTION AREA DATA – Aquifer Protection Areas shown on this map are from the Aquifer Protection Area digital dataset which contains polygon data intended to be used at 1:24,000 scale. The dataset contains regulated areas classified as Level A Aquifer Protection Area (Final) and Level B Aquifer Protection Area (Preliminary). The Level B areas are not shown on the WQC maps. The data was collected from 1991 to the present and is actively updated as Final area mapping replaces earlier Preliminary areas. The Aquifer Protection Areas are delineated by the individual water companies owning the well fields and submitted to the CT DEEP for approval. Preliminary mapping provides a general estimate of the area contributing ground water to the well field. Final mapping is based on extensive, site-specific, detailed modeling of the ground water flow system. CT DEEP may adjust Final area boundaries to be consistent with 1:24,000 scale topography and base map data where appropriate during the approval process.

MAJOR DRAINAGE BASIN DATA – Major drainage basins shown on this map are from Major Basin Line data developed by CT DEEP and intended to be used at 1:24,000 scale.

BASE MAP DATA - Based on data originally from 1:24,000-scale USGS 7.5 minute topographic quadrangle maps published between 1969 and 1992. It includes political boundaries, railroads, airports, hydrography, geographic names and geographic places. Streets and street names are from Tele Atlas® copyrighted data. Base map information is neither current nor complete.

RELATED INFORMATION
This map is intended to be printed at its original dimensions in order to maintain the 1:24,000 scale (1 inch = 2000 feet).
WATER QUALITY STANDARDS - Go to the CT DEEP website for a summary and the full text of the "Water Quality Standards" and for other information on water quality.
AQUIFER PROTECTION AREAS - Go to the CT DEEP website for more information.

ADOPTED DATES

Water Quality Standards
February 25, 2011

Thames River, Pawcatuck River and Southeast Coastal Basins: December 1986

Connecticut River and South Central Coastal Basins: February 1993

Housatonic River, Hudson River and Southwest Coastal Basins: March 1999

MAJOR BASINS

1 Pawcatuck
2 Southeast Coast
3 Thames
4 Connecticut
5 South Central Coast
6 Housatonic
7 Southwest Coast
8 Hudson

MAP LOCATION

State Plane Coordinate System of 1983. Zone 3526
Lambert Conformal Conic Projection
North American Datum of 1983

APPENDIX D

USER PROVIDED INFORMATION

Initials LE

AAI – USER QUESTIONNAIRE

FOR

26 Monroe Street

In order to receive CERCLA liability protection, the *user*[1] must provide the following information (if available). Failure to provide this information could result in the determination that "all appropriate inquiry" was not complete.

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

o Yes
X No
o Unknown

2. **Activity and Use Limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Specifically in Connecticut, this would include Environmental Use Restrictions (EURs), Environmental Land Use Restrictions (ELURs), or Notice and Activity Use Limitations (NAULs) that are in place on the site or that have been filed or recorded in a registry (RCSA 22a-133k-1(e)).**

Are you aware of any AULs, EURs, ELURs, or NAULs such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

o Yes
X No
o Unknown

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

o Yes
X No
o Unknown

[1] The party seeking to complete an AAI to receive CERCLA liability protection

Initials: LE

4. **Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

o Yes
x No
o Unknown

5. **Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, (a.) Do you know the past uses of the property? (b.) Do you know of specific chemicals that are present or once were present at the property? (c.) Do you know of any spills or other chemical releases that have taken place at the property? (d.) Do you know of any environmental cleanups that have taken place at the property?

o Yes
x No
o Unknown

6. **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence of likely presence of contamination at the property?

o Yes
x No
o Unknown

ENVIRONMENTAL SITE RECONNAISSANCE QUESTIONNAIRE

(To be completed by an Owner's representative and Eagle Environmental, Inc.)

Site Name: LEROY DOWNS

Site Address: 26 MONROE ST.

Project No.:

Site Visit Date:

What is the current and past use(s) of the subject property?

Current		**Past**	
Residential – Single Family	☐	Residential – Single Family	☐
Residential – Multi –Family	☑	Residential – Multi-Family	☑
Commercial	☐	Commercial	☐
Industrial/Manufacturing	☐	Industrial/Manufacturing	☐
Unimproved/Raw Land	☐	Unimproved/Raw Land	☐
Agriculture	☐	Agriculture	☐

To the best of your knowledge, what are the current and past uses of the adjoining properties?

Adjoining Property	**Current** Owner	Use	**Past** Owner	Use
North:	MONROE ST			
South:	SNEW	POWER PLANT	SNEW STAGING	
East:	NHA - OFFICE		NHA OFFICE	
West:	NOTHING			

Question	Owner/Property Representative			Observed During Site Visit		
Is the property used for an industrial use?	YES	NO	UNK	YES	NO	UNK
Is any *adjoining* property used for an industrial use?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that any *adjoining* property has been used for an industrial use in the past?	YES	NO	UNK	YES	NO	UNK
Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	YES	NO	UNK	YES	NO	UNK
Is any *adjoining* property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that any *adjoining* property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	YES	NO	UNK	YES	NO	UNK
Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of > 5 gallons (19 Q) in volume or 50 gallons (190 Q) in the aggregate, stored on or used at the property or at the facility?	YES	NO	UNK	YES	NO	UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any damaged or discarded automotive or industrial batteries, or pesticides, paints or other chemicals in individual containers of > 5 gallons (19 L) in volume or 50 gallons (19 L) in the aggregate, stored on or used at the property or at the facility?	YES	NO	UNK	YES	NO	UNK
Are there currently any industrial drums (typically 55 gallons (208 Q)) or sacks of chemicals located on the property or at the facility?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that there have previously been any industrial drums (typically 55 gallons (208 L)) or sacks of chemicals located on the property or at the facility?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?	YES	NO	UNK	YES	NO	UNK
Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that there have previously been any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	YES	NO	UNK	YES	NO	UNK
Is there currently any stained soil on the Property?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that there has previously been any stained soil on the property?	YES	NO	UNK	YES	NO	UNK
Are there currently any registered or unregistered storage tanks (above or underground) located on the property?	YES	NO	UNK	YES	NO	UNK

Did you observe evidence or do you have any prior knowledge that there have previously been any registered or unregistered storage tanks (above or underground) located on the property?	YES	NO	UNK	YES	NO	UNK
Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from or adjacent to any structure located on the property?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that there have previously been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	YES	NO	UNK	YES	NO	UNK
Is there currently evidence of leaks, spills , or staining by substances other than water, or foul odor, associated with an flooring, drains, walls, ceilings, or exposed grounds on the property?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that there have previously been any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	YES	NO	UNK	YES	NO	UNK
If the property is served by a private well or non-public water system, is there evidence or do you have any prior knowledge that contaminants have been identified in the well or system that exceeded guidelines applicable to the water system?	YES	NO	UNK	YES	NO	UNK
If the property is served by a private well or non-public water system is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	YES	NO	UNK	YES	NO	UNK
Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification related to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	YES	NO	UNK	YES	NO	UNK

Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with the respect to the property or any facility located on the property?	YES	NO	UNK	YES	NO	UNK
Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	YES	NO	UNK	YES	NO	UNK
Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	YES	NO	UNK	YES	NO	UNK
Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property, or recommended further assessment of the property?	YES	NO	UNK	YES	NO	UNK
Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	YES	NO	UNK	YES	NO	UNK
Does the property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	YES	NO	UNK	YES	NO	UNK
Does the property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the property and/or into a sanitary sewer system?	YES	NO	UNK	YES	NO	UNK
Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried, and/or burned on the property?	YES	NO	UNK	YES	NO	UNK

Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	YES	NO	UNK	YES	NO	UNK
